

MODEL 20-5.5 (Gas)

## POST PEELER

A quality post peeler at an affordable price. Simple, compact, easy to use...and affordable, too! This machine features a simple dished flywheel with adjustable cut depth; simply pass a log post alongside it for a beautiful finish that looks hand-peeled. (The posts won't require much drying time, either.) There's also a self-contained blower for stockpiling your shavings, giving you an additional income opportunity.
